

Process and pilgrimage is a forum for intellectual and practical inquiry, where exploring another way of being in the world is significant in creating renewal. Lessons understood from the practise of individual awareness form the subtle stage of a call for action.

Seeing through paradox; believing through difference

Thursday July 22nd - Sunday July 25th

Officine Al Sole, La Pila, near Assisi

Stepping across the stones of historical inquiries, broken relationships, scientific theories and philosophical discoveries, we cross the ancient river to the far bank. The serenity of the future bank looks out on the whirlpools of time and asks Who is man that has arrived at this place? What is the nature of the journey that shows itself in this coming turn in the way?

A forum for the committed, a wayfarer's conference, somewhere deep in Italy, where a song crosses disciplines and questing souls meet.

(Dinner July 22nd)
